Our Innovation Process

A structured four-step methodology that transforms ideas into impactful design solutions.

01

Ideate

Generate creative solutions and innovative ideas through collaborative brainstorming sessions guided by industry experts.

02

Select

Evaluate and choose the most viable concepts based on feasibility, impact, and alignment with user needs.

03

Identify

Discover key opportunities and challenges through in-depth research and user-centred design methodologies.

04

Consolidate

Integrate learnings and refine prototypes into production-ready solutions ready for real-world implementation.

Program Highlights

What makes the D-CoE program uniquely positioned to transform your design career.

IISc Certified

Receive certification from one of India's most prestigious research institutions.

Industry Ready Skills

Curriculum designed with industry leaders to ensure job-market relevance.

Hands-on Experience

Learn by doing — labs, workshops, and real-world projects from day one.

Govt. of Karnataka

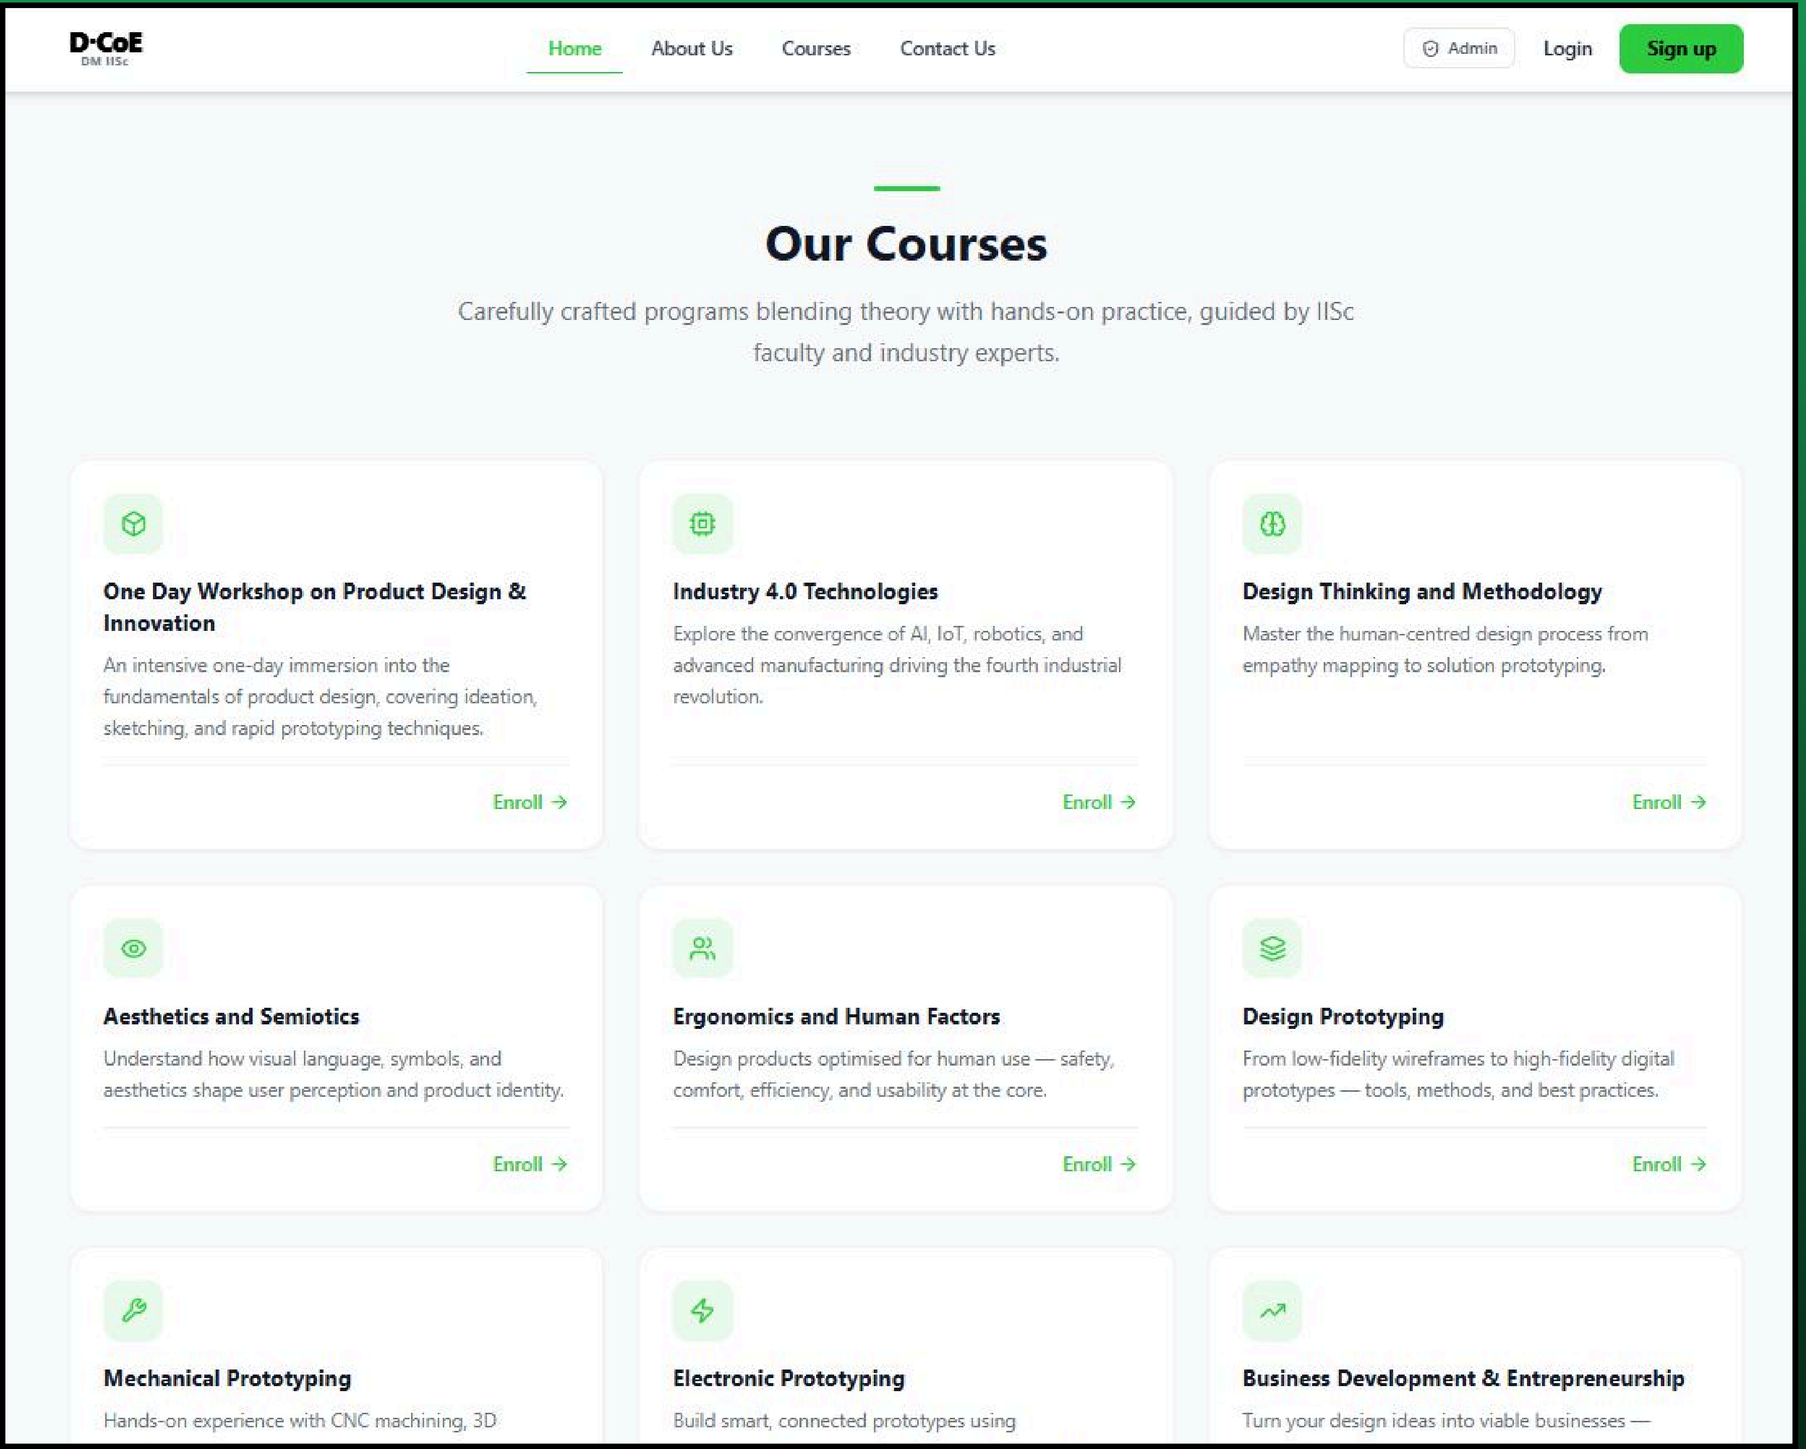
Backed by the Government of Karnataka for quality assurance and reach.

Entrepreneurship

Build the mindset and skills to launch your own design-led venture.

Industry Connect

Access a network of industry mentors, companies, and innovation hubs.



KonfHub links will be added to the enroll buttons. When a module is actively running, users are more engaged and likely to explore other offerings. Since they will already have the platform open, it becomes easier for them to enroll in additional courses.

Who Benefits

D-CoE programs are designed for diverse learners across industry and academia.

Corporates
Upskill product and R&D teams with cutting-edge design methodologies.

Startups
Build design-driven products and develop a strong innovation culture.

MSMEs
Modernise operations and product lines with Industry 4.0 capabilities.

Engineering Faculty
Enrich academic curriculum with practical design and prototyping skills.

Students
Gain industry-ready skills and IISc certification to fast-track your career.

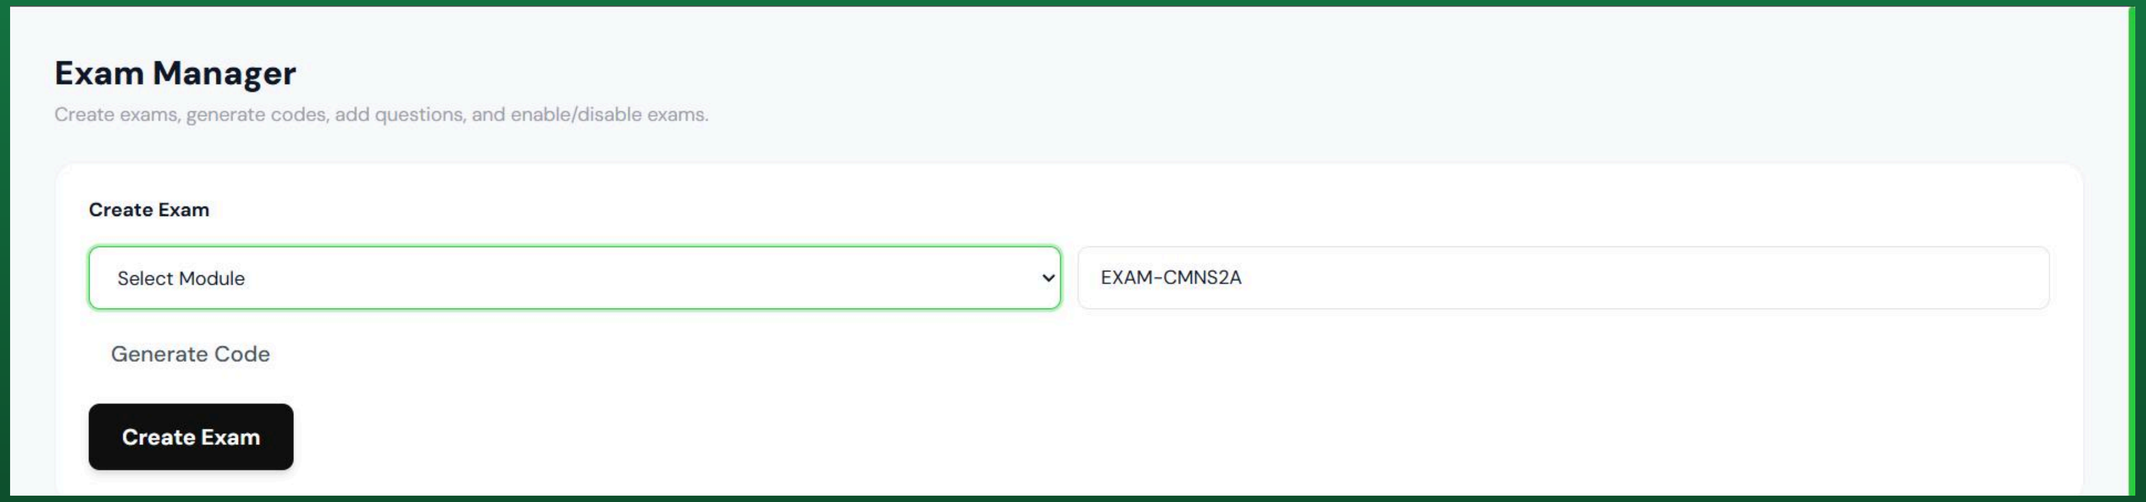
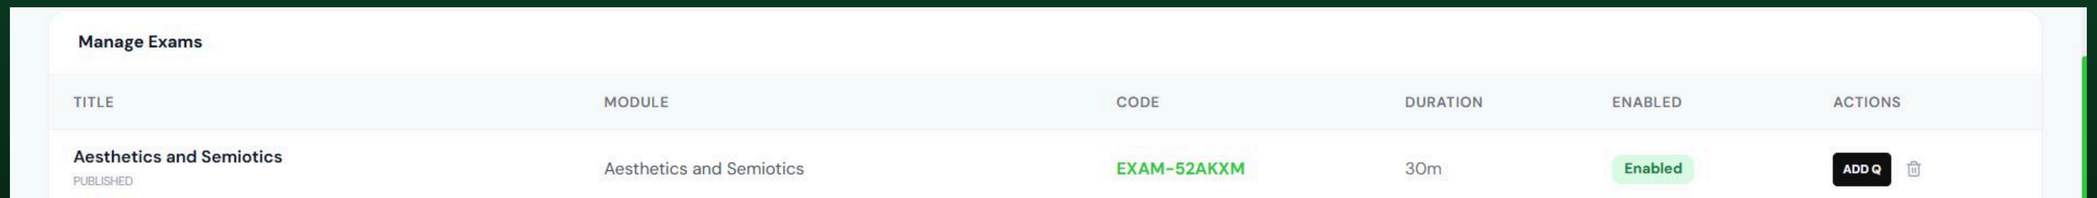
How Exam Manager Works:

1. Select the module the assessment needs to be kept
   Generate the code then create exam



2. There are several ways questions can be uploaded mcq, true/false, short answer and also they can be uploaded via pdf

3. Once Create exam we can see the assessment has been created at the bottom



4. Add questions and done the test will be visble to the students once they login with the code generated for the test.

To Do:

Add a method where the trainer can upload the questions via pdf excel

Add konfhub links

Apart from these the website is completely functional and
will handle 20 to 30 users.
